ABOUT ME

As a dedicated worker my whole life I'm excited to venture into this new career path. Software Engineering has been an interest of mine for a while and I'm excited to now be pursuing it. Learning takes vigilance however I'm enjoying building this skill set.

PRIOR EXPERIENCE

Portfolio Website

- I took everything I learned about HTML and CSS to this point and used it to build my own portfolio site from scratch.
- I intend to refine this site as I learn new technologies.

Airbnb News Clone

- This is my first project working with Bootstrap 4.
- Working with responsive images was a challenge but In the end I believe I was able to come up with satisfying results.

Newsweek Clone

- This is my first go at maintaining breakpoints in a responsive flow with flexbox.
- This is where I learned to use columns and rows effectively.

Apple Clone

- This is the first project in my journey and I learned a lot.
- At first this was intimidating but this project became pivotal in gaining the ability to take hold of all available resources at my disposal and experience what it means to see a web development project through to the end.

Warehouse Lead

- For 15 years (2007 - 2023) I managed a warehouse at Core & Main in the Fire Sprinkler industry.

Air National Guard

- I served for 6 years as a Crew Chief in the Air Force.

EDUCATION

Name of School

Altcademy Bootcamp, 2023

Completed courses in HTML, CSS, and Javascript

Gateway Community College, 2023

Pursuing a degree in Computer Science

TECHNICAL SKILLS

Javascript

HTML

CSS

Bootstrap

Git

SOFT SKILLS

Leadership

Team Oriented

Communication

Problem Solving
